ADEM BENLECHHEB

Algiers, Algeria | adembenlecheb1@gmail.com

Arabic (Native) · English (C1) · French (C1 comprehension / B2 spoken)

PROFESSIONAL SUMMARY

Electrical engineer (MSc, top of class) with hands-on exposure to gas turbine power generation, grid operations, and industrial process controls. Completed maintenance rotations at an open-cycle gas power plant (Ansaldo V94.3A and GE TM2500 fleet), including DCS operations and turbine auxiliary systems. Currently applies process monitoring and equipment optimization skills in a live manufacturing environment. Fluent in Arabic, English, and French; available for full international deployment.

WORK EXPERIENCE

Production Planning Engineer | Elsewedy Electric – Cables & Wires Division | Ain Defla, Algeria *Aug 2025 – Present*

- Monitor daily manufacturing operations across eight stranding production lines, identifying equipment loading conflicts and resolving them through custom scheduling tools.
- Investigate production and material-flow bottlenecks using large-scale ERP datasets, applying statistical methods to validate performance benchmarks.
- Coordinate raw material availability checks with production teams to prevent unplanned line stoppages.
- Support continuous process improvement initiatives aimed at reducing operational costs and downtime.

Internship – Gas Power Plant Operations & Maintenance | Sonelgaz (SPE), El Hamma Facility | Algiers, Algeria *04/01/2024 – 06/01/2024*

- Completed four weeks of structured maintenance rounds across an open-cycle gas turbine fleet (Ansaldo V94.3A primary units, GE TM2500 aeroderivative units).
- Gained direct exposure to gas skids, lube oil systems, compressed air systems, and demineralized water treatment processes.
- Studied plant DCS operations (Egatrol control system) and safety-critical HSE case studies as part of operational training.

Internship – Electrical Maintenance & Grid Operations | Sonelgaz | Blida, Algeria *04/2023 – 06/2023*

- Assisted with electrical maintenance and grid operations tasks, including equipment inspection and fault-diagnosis support at a distribution site.

Internship – Production Line Maintenance & Equipment Optimization | Elsewedy Electric | Ain Defla, Algeria *03/2022 – 06/2022*

- Supported production line maintenance tasks and contributed to early-stage equipment optimization initiatives on the cables manufacturing floor.

Electronics & Controls Engineer (Self-Directed, Academic Startup Project) | Alpelec Laboratory | Sidi Bel Abbès, Algeria *Oct 2023 – Jul 2025*

- Co-founded and designed control circuits for a hospital disinfection device generating ozonated water.
- Developed automated features including hand-detection-based flow regulation and adjustable ozone concentration control.
- Collaborated within a multidisciplinary team to prototype, test, and refine the system end-to-end.

EDUCATION

Master's Degree in Electrical Engineering | Djillali Liabès University | Sidi Bel Abbès, Algeria *2020 – 2025*

- Focus: power systems — grid structure, protection, high-voltage design and applications.
- Thesis: designed a high-voltage system to generate and inject ozone into water as a low-cost disinfectant alternative.
- Graduated top of class (Bachelor's and Master's).

TECHNICAL SKILLS

Power Generation & Plant Systems: Gas turbine fleet familiarity (Ansaldo V94.3A, GE TM2500), turbine auxiliary systems, DCS operations (Egatrol), grid protection & high-voltage systems

Software & Tools: MATLAB, Primavera P6, SolidWorks, Python (intermediate), C++ (beginner)

CORE COMPETENCIES

Onsite Coordination · Cross-Functional Collaboration · Continuous Monitoring · Production Optimization · Time Management · Communication
